

International Trade

— Advancing Medical Innovation, Patient Access and Economic Growth —

The United States is the world's leader in the development of advanced medical technology. This leadership results in improved patient care and drives the innovation economy. America's medical technology companies support global trade agreements that open markets and create economic opportunities for Americans.

Economic Growth is crucial for continued job creation in the United States

The average Medtech salary is **\$58,000** while the average national wage is **\$41,000**

Global Competitiveness keeps jobs in America

40%

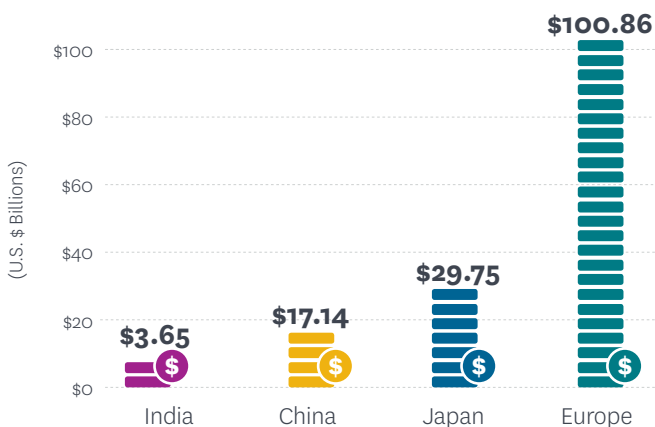

The United States accounts for **40 percent** of the global medtech market.

Medtech Companies Export \$42B Annually

The U.S. has a positive trade balance in medical devices exporting **\$5.48B more** than it imports.

Size of Medical Device Market 2014

Epicom, The World Medical Markets Fact Book 2013 (August 2013)

“It is critical to improve access to international markets by insisting on free and fair trade, and working with foreign governments to develop innovation-friendly policies. Other countries are anxious to overtake the U.S. as the leader in medical technology and innovation. Putting in place policies that encourage worldwide innovation and patient access is good for patients and good for companies.”
