

# THE PHYSICIAN PAYMENTS SUNSHINE ACT AND YOU

building stronger industry-physician interactions

Medical Technology Manufacturers are committed to accurate reporting and meaningful transparency

## WHAT IS THE PHYSICIAN PAYMENTS SUNSHINE ACT?

Signed into law in 2010 as part of the Affordable Care Act, the Physician Payments Sunshine Act (the “Sunshine Act”) requires manufacturers, including certain distributors, of medical devices, drugs, biologicals, and medical supplies to track and report certain payments made to and transfers of value provided to physicians and teaching hospitals.

The Sunshine Act also requires manufacturers and Group Purchasing Organizations (GPOs) to report certain ownership and investment interests held by physicians and their immediate family members.

## WHY WAS THE SUNSHINE LAW ENACTED?

The main purpose of the Sunshine Law is to provide patients with enhanced transparency into the relationships their health care providers have with life science manufacturers, including medical technology companies. It’s important to note that the Sunshine Law does not restrict industry-physician collaboration or interactions, or prohibit payments or transfers of value. **Rather, it requires tracking and reporting of payments and transfers of value that result from these interactions.**

## WHAT IS THE TIMING OF THE SUNSHINE LAW REQUIREMENTS?

- **March 31:** Deadline for Manufacturers to submit required data to CMS covering:
  - Payments and Transfers of Value given to Physicians & Teaching Hospitals in previous Calendar Year (CY); and

Physicians are also able to seek correction or contest reports for two years after access has been provided to a report with disputed information.

By **April 1**, CMS submits an annual report to Congress that will include aggregated information submitted during the previous calendar year (ex: report issued April 2017 covers data collected in CY 2015 and submitted March 2016), as well as any enforcement actions taken and any penalties paid.

## WHAT PAYMENTS/TRANSFERS OF VALUE ARE EXCLUDED FROM REPORTING?

## WHAT ARE THE PENALTIES FOR NON-COMPLIANCE?

Reporting incomplete or inaccurate information has the potential to mislead patients and other stakeholders and damage the reputation of manufacturers, physicians and teaching hospitals.

Depending on the circumstances, non-compliance with the Sunshine Law's reporting requirements could subject a manufacturer to financial penalties ranging from:

## HOW CAN I WORK TOGETHER WITH MEDICAL TECHNOLOGY COMPANIES TO PROMOTE ETHICAL COLLABORATION?

AdvaMed and its members support the transparency goal of the Sunshine Law to ensure that health care professionals, like you, continue to make independent decisions regarding the health care and treatment of patients and the development and improvement of medical technology. You can work with us to promote strong standards in all interactions with industry. Medtech companies can assist you in educating your colleagues and patients about the requirements of the Sunshine Law. Important elements to remember include:

- Industry collaboration with health care professionals is necessary to promote the safe and effective use of medical technologies as well as design innovative and advanced technologies;
- Your patients and other stakeholders may not understand the benefits of industry collaborations with health care professionals, and how and why such collaborations may result in bona fide payments and transfers of value and the need to make such payments public;
- The specific information that is required to be reported by manufacturers that will be publicly available on the Internet;
- The importance of working with manufacturers to promote the accurate capture, tracking, auditing and monitoring, documentation and reporting of information to ensure maximum compliance with the Sunshine Law, as most of the information will be published by CMS onto a public website.
