

THE PHYSICIAN PAYMENTS SUNSHINE ACT

a teaching hospital guide to industry transparency reporting requirements

WHAT IS THE PHYSICIAN PAYMENTS SUNSHINE ACT?

Signed into law in 2010 as part of the Affordable Care Act, the Physician Payments Sunshine Act (the "Sunshine Law") requires manufacturers, including certain distributors, of medical devices, drugs, biologicals, and medical supplies to track and report certain payments made to and transfers of value provided to physicians and teaching hospitals.

Teaching Hospitals are defined as hospitals that received payment for Medicare direct graduate medical education (GME), inpatient prospective payment system (IPPS) indirect medical education (IME), or psychiatric hospital IME programs during the last calendar year for which such information is available. CMS will publish a list on annual basis of hospitals which it considers to be teaching hospitals.

The Sunshine Law also requires manufacturers and Group Purchasing Organizations (GPOs) to report certain ownership and investment interests held by physicians and their immediate family members.

WHY WAS THE SUNSHINE LAW ENACTED?

The main purpose of the Sunshine Law is to provide patients with enhanced transparency into the relationships their health care providers have with life science manufacturers, including medical technology companies. It's important to note that the Sunshine Law does not restrict industry-physician collaboration or interactions, or prohibit payments or transfers of value. **Rather, it requires tracking and reporting of payments and transfers of value that result from these interactions.**

- Transfers of Value to Non-Physician Employees would need to be reported if:
 - the payments were made to the non-physician employees **at the request of** or designated by the Manufacturer **on behalf of** a covered recipient Physician or Teaching Hospital [pursuant to 42 C.F.R. §403.904(a) and (c)(10)]

 - ex: a Manufacturer providing equipment to a non-physician employee of a Teaching Hospital that is intended to benefit the Teaching Hospital is considered an indirect payment to the Teaching Hospital.

By **June 30**, (a) data regarding previous Calendar Year (CY) payments, transfers of value and ownership interests will be **published** on the CMS public website and (b) **reports** summarizing payments made to covered recipients in each state will be submitted by CMS to the states.

By **April 1**, CMS submits an annual report to Congress that will include aggregated information submitted during the previous CY, as well as any enforcement actions taken and any penalties paid.

HOW WILL RESEARCH PAYMENTS BE HANDLED?

Payments related to research must be reported separately and submitted the year the payment occurs stating: the *institution name & principal investigators*.

- For payments made in connection with continuing education programs, Companies should determine whether these payments are considered to be "indirect payments," as that term is defined in the Sunshine Act regulations. See FAQ 8165 at <https://go.cms.gov/2FYSAuV>

Value of Industry-Provider Collaborations

Collaboration and interactions between medical technology companies and health care providers are essential to advancing new, safe and effective medical technologies that benefit patients. AdvaMed recognizes that this goal must be balanced against the obligation of health care providers to make independent decisions regarding the care and treatment of their patients. AdvaMed and its member medical technology companies are committed to transparency with patients about interactions between providers and industry. For this reason, AdvaMed supports the Physician Payments Sunshine Law.

For more information about the value of interacting with a company that has certified to the AdvaMed Code of Ethics

HOW CAN TEACHING HOSPITALS WORK TOGETHER WITH MEDICAL TECHNOLOGY COMPANIES TO PROMOTE COMPLIANCE?

AdvaMed and its members support the transparency goal of the Sunshine Law to ensure that physicians and teaching hospitals continue to make independent decisions regarding the health care and treatment of patients and the development and improvement of medical technology. Teaching hospitals can work with us to promote strong standards in all interactions with industry. Medtech companies can assist teaching hospitals in educating their health care professionals and patients about the requirements of the Sunshine Law. Important elements to remember include:

- Industry collaboration with teaching hospitals and health care professionals is necessary to promote the safe and effective use of medical technologies as well as design innovative and advanced technologies;
- Your patients and other stakeholders may not understand the benefits of industry collaborations with teaching hospitals and health care professionals, and how and why such collaborations may result in bona fide payments and transfers of value and the need to make such payments public;
- The specific information that is required to be reported by manufacturers that will be publicly available on the Internet;
- The importance of working with manufacturers to promote the accurate capture, tracking, auditing and monitoring, documentation and reporting of information to ensure maximum compliance with the Sunshine Law, as most of the information will be published by CMS onto a public website.

Many AdvaMed member companies have certified to compliance with the AdvaMed Code of Ethics on Interactions with Health Care Professionals which also supports ethical collaborations. It is by driving ethical collaborations that we help protect patients. To see the companies that have certified to the Code, visit:
