

MEDTECH ON THE MOVE | BOOTH #829

# NCSL Legislative Summit 2025

## ABOUT ADVAMED

AdvaMed is the leading trade association for manufacturers of medical devices, diagnostic products, and digital health technologies that are transforming health care through the potential for earlier disease detection, less invasive procedures, and more effective treatments. AdvaMed's over 600 members range from the largest to the smallest medical technology innovators and companies.

## FEATURED MEDTECH

Johnson & Johnson  
MedTech

### TELIGEN

The TELIGEN™ System delivers an advanced visualization experience and user-centric procedural control. The digitally enabled TELIGEN™ Camera, located at the distal end of the patient-specific port, eliminates the need for a microscope and can provide an unobstructed view of the surgical site. It offers hands-free visualization during the procedure, along with a multidirectional and expanded field of view.

Medtronic

### Medtronic Simplicity Spyral

The Simplicity Spyral RDN system is an innovative, minimally invasive procedure that delivers radiofrequency energy to disrupt overactive nerves near the kidneys that contribute to high blood pressure. Simplicity Spyral is the only commercially available RDN device with the breadth of durable, consistent, long-term data using a single catheter design.

The ZOLL logo, consisting of the word "ZOLL" in a bold, blue, sans-serif font, is centered within a light blue circular background.

### **ZOLL Automated External Defibrillators (AEDs)**

The ZOLL AED 3® defibrillator guides the user through the process of performing high-quality CPR and will, if needed, deliver a potentially lifesaving shock to the heart. ZOLL's proprietary Real CPR Help® technology helps guide rescuers in performing high-quality CPR, in accordance with the most recent guidelines for depth and rate of compression.

### **ZOLL Heart Failure Management System**

The Heart Failure Management System (HFMS) is a non-invasive, patch-based solution that uses novel radiofrequency technology for early detection of changes in pulmonary fluid levels, an increase of which is an early indicator of heart failure decompensation. Research published in JACC Heart Failure shows that the HFMS reduces 90-day hospital readmission by 38%.
